Wendover Air Force Base  
Squadron Hangar (also  
(Maintenance Hangar)  
(Building No. 811)  
HABS No. UT-125-P  
Page 1

Built in 1943 as part of the expansion of facilities at the base, this large hangar closely resembles buildings #800 and #821. The rectangular building faces south to the anchorage apron and is of "Mobilization," "Semi-Permanent" type construction. Containing 12,796 square feet on one floor, it was built for a cost of \$175,000.00 on plan 117/6-1 by H & D Company.

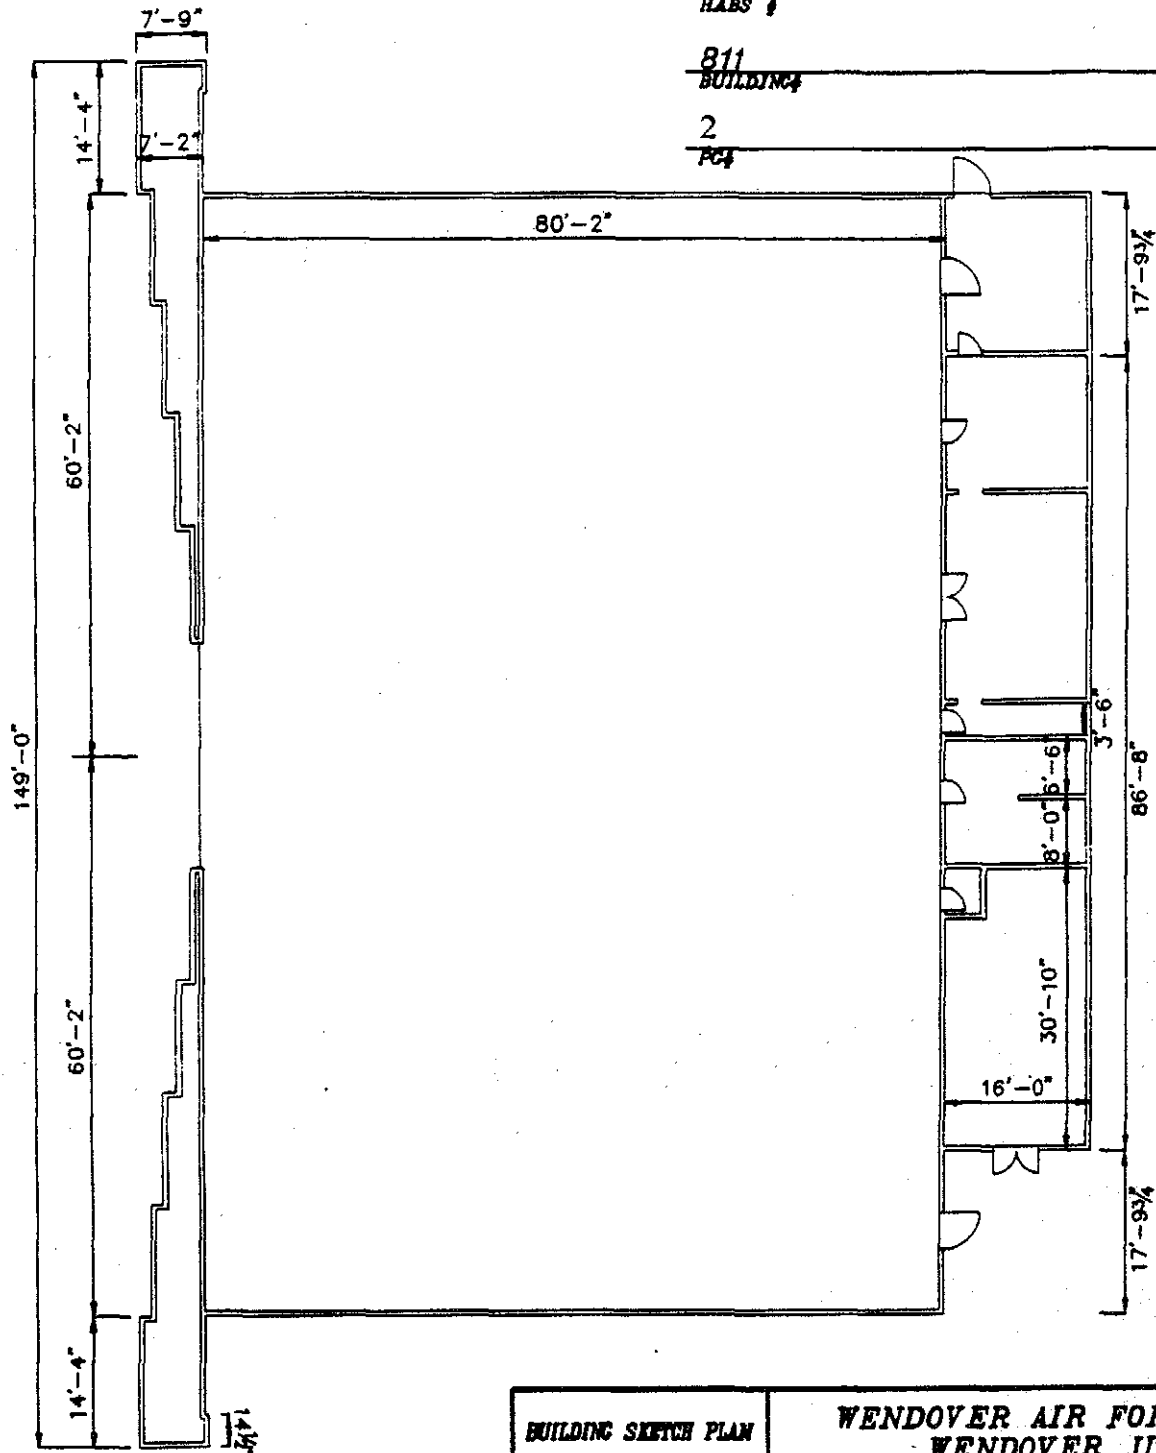

The building has a concrete foundation and floor, with wood-frame walls and truss roof. This hangar is dimensionally and architecturally similar, inside and out, to the other hangars built from the same plans. The only difference is in fenestration. The lowest of the three bands of windows has been painted over on the south, east and west elevations, giving the building a more squat appearance. Although not recently maintained, the building appears to be structurally sound.
